

JOB POSTING: Summer 2021 Device Specialist

WHO we are is a fast-growing, environmentally-conscious technology company made up of innovators and limit pushers.

WHAT we do is recover, revive and reuse technology. Our expertise in repair and refurbishing allows us to breathe life into used technology and distribute it into the secondary market.

HOW we do it is by allowing our work to be guided by our three core values that inspire us every day - Find A Way, Elevate Others, and See What You're Capable Of. [Check out a bit about our culture.](#)

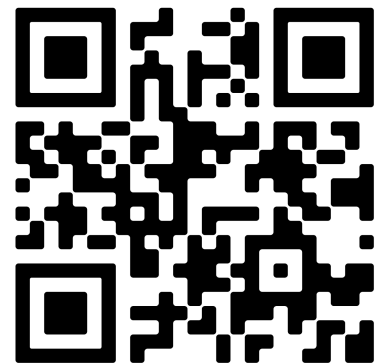

Times are busy for remote learning and working throughout the nation and Tech Defenders is still growing! We are currently looking to hire a number of Summer Device Specialists. Device Specialists are the backbone of what we do at Tech Defenders and are able to complete a variety of tasks. These roles pay \$14/hour and will work Monday through Friday, 8am-5pm. Tech Defenders is able to accommodate various other part-time schedules as well!

The Device Specialists will:

- First and foremost, embrace and live our core values. Beyond skills, education, or experience, we only welcome talent to our team that aligns with our driven, team-focused, and collaborative culture
- Be a team player going out of their way to help elevate others
- Show their ability to work independently as well as within a team
- Be accountable to, and responsible for, cleanliness of workstations
- Have good communication skills – both verbal and written with strong attention to detail
- Ability to lift and carry objects up to 50lbs for a short distance
- Thrive in our rapid-pace environment focusing on continuous improvement
- Have a safety mindset

If this sounds like the perfect culture for you, dust off your resume (and perhaps that ping pong paddle?) and apply today. We'd love to chat with you. Equal opportunity employer.
